

Date _____ Name _____

Rank from 1-8	ART7 Art 7	Art 7 introduces students to foundational drawing skills through line, value, and shading. Using graphite, charcoal, and ink, students practice contour drawing, value scales, and still-life shading to create depth and realism, building confidence and technical skills for future art learning.
	INMUS7 Band (Instrumental Music) 7	Join the band and experience the thrill of making music together! Whether you're picking up an instrument for the first time or honing your skills, this full-year course will help you develop technique, musicality, and teamwork. You'll play a variety of pieces, learn the fundamentals of reading music, and have opportunities to perform throughout the year. The school will help organize the rental of your instrument.
	CONST7 CTF Construction 7	Step into the woodworking shop to learn carpentry and design through hands-on projects. Students safely use hand and power tools to measure, build, and finish creative pieces while developing skills, confidence, and teamwork.
	DESNST7A CTF Design Studies 7A	Digital Media is a course explores graphic design, video editing, photography, and social media storytelling, giving students the tools to produce engaging and impactful content. Learn how to navigate digital platforms, edit images and videos, and develop your artistic voice through modern media techniques. Whether you're interested in visual arts, content creation, or digital storytelling, this class will help you bring ideas to life in the digital age. Ready to create something amazing?
	DESNST7B CTF Design Studies 7B	Crochet - Let's get stitching! In this hands-on course, students will learn the basics of crochet, including how to hold a hook, start a chain, and create simple stitches. You'll learn to read beginner-friendly patterns and work toward making your own small projects like scrunchies, coasters, headbands and amigurumi.
	FOODS7 CTF Foods 7	Foods - In this hands-on course, students will start by learning the essentials of kitchen safety and food handling. From there, they'll dive into a variety of baking methods, explore the science behind great bakes, and try their hand at recipes like cookies, muffins, quick breads, cupcakes, biscuits, and simple pastries.
	DRAMA7 Drama 7	Shine behind the scenes or on centre stage! After an orientation unit reviewing and expanding on tableau, stage directions, and mime, students will dive into improvisational theatre. They will spend time playing improv games and working on both spontaneous and planned scenes. Later in the course, students will explore techniques for bringing scripted scenes to life and gain some introductory experience in technical theatre, including lighting and costumes.
	ENVOTED7 Environmental and Outdoor Education 7	This is an active hands-on course where students will get a chance to investigate different outdoor activities. Students will also investigate the Alberta environment and their relationship to it. This course will emphasize risk assessment and decision making, both as an individual and as part of a group. We will endeavor to include off-site trips to complement this learning, and we will be taking our learning outside in all weather conditions.
