Rank from 1-9	ART9 Art 9	Art 9 challenges students to expand their artistic skills through more advanced techniques, creative problem-solving, and personal expression. Students explore drawing, painting, mixed media, and digital tools while deepening their understanding of composition, contrast, form, and colour theory. Projects may include perspective work, portrait studies, collaborative pieces, and thematic explorations that encourage students to develop their own artistic voice. Ongoing feedback and reflection help students refine their technique and prepare for high school art pathways.
	INMUS9 Band (Instrumental Music) 9	Join the band and experience the thrill of making music together! Whether you're picking up an instrument for the first time or honing your skills, this full-year course will help you develop technique, musicality, and teamwork. You'll play a variety of pieces, learn the fundamentals of reading music, and have opportunities to perform throughout the year. The school will help organize the rental of your instrument.
	CONST9 CTF Construction 9	Step into the woodworking shop to learn carpentry and design through hands-on projects. Students safely use hand and power tools to measure, build, and finish creative pieces while developing skills, confidence, and teamwork.
	DESNST9A CTF Design Studies 9A	Cricut and 3D Printing - In this hands-on course, students will explore digital and 3D design by creating projects using tools like Canva, Cricut, and 3D printers. They will design and produce items such as keychains, vinyl decals, paper crafts, and custom 3D models. Through the design process, students will build skills in planning, problem-solving, prototyping, and safe equipment use while developing confidence in creating high-quality, personalized products.
	DESNST9B CTF Design Studies 9B	Crochet - Let's get stitching! In this hands-on course, students will learn the basics of crochet, including how to hold a hook, start a chain, and create simple stitches. You'll learn to read beginner-friendly patterns and work toward making your own small projects like scrunchies, coasters, headbands and amigurumi.
	ENTINOV9 CTF Enterprise and Innovation 9	Turn ideas into action in Business & Entrepreneurship! This course introduces the fundamentals of business planning, marketing, financial literacy, and leadership. Learn how to develop creative business ideas, manage resources, and navigate real-world challenges. Whether you're interested in launching a start-up, understanding global markets, or honing problem-solving skills, this class empowers you to think like an entrepreneur. Ready to take the first step toward building your future?
	FOODS9 CTF Foods 9	Bake like a pro! In this hands-on course, students will start by learning the essentials of kitchen safety and food handling. From there, they'll dive into a variety of baking methods, explore the science behind great bakes, and try their hand at recipes like cookies, muffins, quick breads, cupcakes, biscuits, and simple pastries.
	DRAMA9 Drama 9	Step into the director's chair and take control of the spotlight! This course focuses on two key elements of theatre: directing and lighting. Students will learn how to shape scenes using stage areas, movement, character objectives, status, and space. At the same time, they will gain hands-on experience with stage lighting, learning how to set up, focus, adjust color, and operate the lighting board.
	ENVOTED9 Environmental and Outdoor Education 9	This is an active hands-on course where students will get a chance to investigate different outdoor activities. Students will also investigate the Alberta environment and their relationship to it. This course will emphasize risk assessment and decision making, both as an individual and as part of a group. We will endeavor to include off-site trips to complement this learning, and we will be taking our learning outside in all weather conditions.
